Info Booklet

Chemtogether 2019
The ETH Zurich Chemistry Career Fair

Tuesday - Wednesday
5.11.2019 & 6.11.2019
HCl Building
ETH Zurich
We welcome you to the seventh rendition of the Chemtogether career fair, one of the largest recruiting events for companies of the chemical and pharmaceutical industries in Switzerland. This year's fair will take place on November 5th and 6th on the Hönggerberg Campus at ETH Zurich. Its main purpose is to connect academia's top talents in the fields of chemistry, chemical engineering, pharmaceutical and life sciences, with local and international companies working in these sectors.

At ETH Zurich, fostering innovative and critical thinking as well as developing entrepreneurial skills are key ambitions in education and training. To get in touch with these future employees with valuable expertise, Chemtogether provides a great opportunity for companies to present themselves to the students, PhD students as well as PostDocs at the Department of Chemistry and Applied Biosciences.

We are pleased to invite you to take this opportunity and join us at this year's Chemtogether!

Andreas Gimpel
Konstantin Zouboulis

Co-Heads of the Chemtogether Organizing Committee
Consistently ranked as one of the Top Ten universities globally, ETH Zurich provides a world-class education to its students. Its Department of Chemistry and Applied Biosciences has an exceptional reputation due to a long-standing tradition. It occupies a dominant position as the educator of 40% of chemists trained in Switzerland. With more than 37% international students, the department also attracts young talents from all over the world with a broad interdisciplinary background.

At Chemtogether, we invite you to interact with the students, PhDs and PostDocs of the department, no matter the size or the background of your company. Moreover, Chemtogether enables you to become one of only nine companies per day presenting themselves to future employees and students of all levels of training in an exclusive and personal manner.

Facts and Figures

ETH Zurich educates 40% of all chemists in Switzerland, so Chemtogether provides a perfect platform to attract Swiss educated Chemists.

ETH Zurich is consistently ranked as the best University in continental Europe and one of the Top Ten universities worldwide.

Chemtogether 2018 achieved an average rating of 5.4/6 by attending companies.

Last year around 500 visitors per day attended the Chemtogether career fair.
Contrary to many other career fairs, Chemtogether is specialised in areas such as chemistry, chemical and process engineering, as well as pharmaceutical and life sciences. To maximize your exposure and ensure your success during the fair, we offer the opportunity to give a small presentation and conduct interviews with interesting candidates.

Located at the heart of the department building, the Chemtogether fair is at the center of attention while your company gets in touch with the talents of one of the world’s leading universities. 89% of all companies having attended last year’s event had decided to participate in Chemtogether again; thus, we are confident that Chemtogether is a successful and valuable platform for both students and companies.

For your participation in the Chemtogether career fair, we offer four different partnership options with different levels of additional advertisements and events.

Details about the Basis (C), Silver (Ag), Gold (Au) and Platinum (Pt) Packages are presented subsequently.

Basic Infrastructure
Your booth with 9m² and two tables and chairs - or 12m² and three tables for gold partners - is supplied with WiFi and electricity. During the fair, you will have access to a break room with drinks, coffee and a complementary, cold lunch.

Company Profile
A short profile with information about your company and your requirements for candidates will be published in our fair guide and on the fair’s website.

Jobwall
During the fair, printed offers of your choice for full-time positions and internships are posted at our job board.

Flash-Presentation
Ten minute presentations on a topic of choice in a room directly next to the fairground during the expo day.
Employee Interview

We conduct an interview with a company member of your choice to give students an insight in his/her daily business. The interview will be published on our website and social media together with your company profile.

Ads in Expo Guide

In addition to your company profile, we will print an advertisement of your choice in the fair guide which is distributed to attendees of the career fair.

Promotion

After your registration and in the weeks leading up to the fair, we will promote your company profile and interviews on our Facebook and LinkedIn channels.

Ads in Magazine

An ad of your choice will be published in the chemistry students magazine “Exsikkator”. Advertising in the student magazine expands your visibility at the chemistry department of ETH Zurich significantly.
**Prominent Booth Position**

Chemtogether’s gold/platinum partner is located in a large central booth. This well attended booth provides you with the perfect opportunity to start a conversation with our students.

**Auditorium-Presentation**

The possibility to hold a large presentation of your choice in our auditorium during the fair. The presentation will be advertised by Chemtogether.

**Job Interviews**

We provide an additional room for your company which you may use to perform interviews with attendees and applicants in a calm environment.

**Career-Event**

According to your wishes, we will organize a career event of your choice with your company at any time prior to or after the fair at the ETH Hönggerberg Campus.
Chemtogether will be located in the heart of the Chemistry department of ETH Zurich at the ETH Hönggerberg Campus near Downtown Zurich

Looking back on Chemtogether 2018

Chemtogether 2018 was a successful career event with 18 companies and more than 500 visitors attending the fair over the two day period. Together with several talks by company representatives and an accompanying supporting programme, all exhibitors were satisfied. Based on the feedback from companies and visitors, Chemtogether 2018 received a 5.4/6 rating on average and suggestions for improvement which will be implemented for this year’s event.

Our Partners of 2018
If you decide to present your company at our fair in November, please let us know at your earliest convenience. In the past years, slots have filled up quickly and only a limited number of companies may attend on one of the fair days.

Confirmations should be finished by May 24th. This allows to account for your specific wishes and needs, discussing particulars, planning your page of the fair guide and talking banner sizes among other aspects. Since Chemtogether will take place over two days, please let us know immediately on which date you would like to attend the company fair - as the number of participants is limited, later confirmations may run into reservation conflicts.

The dates set for this year’s Chemtogether are the 5th and 6th of November. Feel free to reach out to us anytime under the email address acquisition@chemtogether.ethz.ch, especially if you have any questions.
About Us

Chemtogether was created to ease the transition between academic studies and a subsequent profession as well as to give students an overview of possible disciplines and careers in industry. Since a pitch by a small group of students, it has become a collaborative project between the department and its graduate and postgraduate associations.

Organization

The VCS (Union of Chemistry Students at the ETH Zurich) is the student association responsible for the majority of students of the D-CHAB which includes students of Chemistry, Chemical Engineering and Interdisciplinary Sciences. Founded in 1893, the VCS celebrated its 125th anniversary last summer. The VCS is in turn a part of the VSETH (Union of Students at the ETH Zurich), which represents the broader interests of all Bachelor and Master students of the ETH.

The VAC (The Academic Association of Scientific Staff at ETH Zurich) represents all scientific staff, PhD students and Postdocs of the Department. It is a subgroup of the AVETH, the Academic Association of Scientific Staff of the ETH.

The D-CHAB (Department of Chemistry and Applied Biosciences) with its international faculty of 55 research professors, approximately 1100 bachelor, master and exchange students, 490 doctoral students, 170 postdoctoral fellows and its supporting scientific, technical and administrative staff (600 FTE) is one of the largest of its kind. It is located in some of the finest research and teaching facilities with excellent equipment and infrastructure, located at the Hönggerberg Campus.
