# eSIM Activation Instructions

## Apple Device

**Note:** Before attempting to activate your eSIM make sure your device is connected to Wi-Fi.

### Scan a QR code

Use these steps to scan a **QR code** and download your eSIM settings. You must contact your carrier to activate service first.

1. Go to **Settings > Cellular**.
2. Tap **Add Cellular Plan**.
3. Use your iPhone camera to scan the **QR code**.
4. If you're asked to enter a confirmation code to activate the eSIM, enter the number provided with the QR code.

### Enter the information manually

If necessary, you can manually enter your plan information using these steps:

1. On your iPhone, go to **Settings > Cellular**.
2. Tap **Add Cellular Plan**.
3. Tap **Enter Details Manually** at the bottom of your screen.
4. Follow the on-screen instructions to manually enter the required information.

## Label your plans / lines

After your second plan is activated, you can label your plans / lines for easy identification. For example, you can label one plan Business and the other plan Personal.

1. Tap **Settings > Cellular**.
2. Tap the number you wish to change the label for, then tap **Cellular Plan Label**.
3. Choose to create a custom label or select from the following labels
  - **Primary**
  - **Secondary**
  - **Personal**
  - **Business**
  - **Travel**
  - **Cell Data**

## Switch between or erase eSIM's

You can store more than one eSIM in your iPhone, but you can use only one eSIM at a time.

### Switch between eSIM

To switch which eSIM is active, follow these steps:

1. Tap **Settings > Cellular > Cellular Plans**.
2. Tap the plan you want to use, then tap **Turn On This Line**.

### Erase eSIM

You can only have upto 10 eSIM profiles stored on your device at a time. To delete an eSIM profile, follow these steps:

1. Tap **Settings > Cellular**.
2. Tap the plan you want to delete.
3. Tap **Remove Cellular Plan**.
