CAPITAL

ADVANTAGES OF ROLE SEGREGATION

We do believe in Asset Management and Custodian Bank segregation:

- Sumus Capital assists clients with their relationships with banks, providing efficient management of contractual clauses and negotiation of fees.
- This approach results in lower overall fees for clients and facilitates matters related to account opening and maintenance.
- Asset managers at Sumus Capital build closer relationships with clients, offering more personalized services than traditional banks
- This approach enables a thorough oversight of clients' wealth, with the asset manager overseeing the bank, and the bank overseeing the asset manager.
- Clients benefit from a collaborative and vigilant approach to managing their assets, ensuring transparency and accountability in financial dealings

CLIENT SATISFACTION

- Listening carefully to our clients' needs and maintaining a constant dialogue with them is the basis of our activity and enables us to provide a personalized service that adapts to the clients' changing needs and objectives
- Our aim is to create a trusting relationship that lasts over time and can span generations

EMPLOYEE HAPPINESS

- Our main stakeholders are Sumus' employees
- Professional environment, characterized by integrity, competence, cooperation and friendliness
- The flat internal organization, with a minimal hierarchical structure, creates a particularly efficient, productive and stimulating working environment

BUSINESS PROFITABILITY

- Business focused on client satisfaction and employee empowerment
- We prefer to focus on long-term solid value creation rather than short-term profitability

ENVIRONMENTAL CONSCIOUSNESS

- We strive to have a positive impact on the environment
- Our aim is to integrate clients' interests, employees' satisfaction and company profitability with respect for the environment

TRANSPARENCY

- Client stewardship and alignment with client's wishes as top priorities

SOLIDITY

- Authorized and regulated by FINMA
- Strong capital base
- Auditor: KPMG
- Legal counsel: Schellenberg Wittmer

EXPERTISE

- Created by investment professionals who have been working together for over 15 years
- Experienced Asset Management team in Bonds, Equities and Commodities combined with senior Wealth Management professionals

WHAT MAKES US DIFFERENT

- Regular Family Offices typically start when Client Relationship Managers decide to become independent after developing strong relationships with their clients over time. However, Sumus Capital's story is different. A decade ago, the Partners of Sumus Capital were managing the assets of a client. Over the years, the client not only found them to be a profitable team but also trusted them implicitly. After eight years of successful collaboration, the client sought their expertise to establish his own Family Office. This is how Sumus Capital came into existence.
- Each of us is a specialist:
 - seasoned asset managers;
 - relationship managers for private and institutional clients;
 - experienced compliance;
 - operations officers.
- We believe that clients will choose us based on the quality of the company and its staff.
- We are different in the sense that we decided to invest in the soundness and solidity of our company:
 - We raised a capital of CHF 1.5 mn, larger than most of our competitors' initial working capital.
 - We immediately applied for FINMA authorization which we got in a matter of months.
 - The best professionals got involved as partners of Sumus Capital: KPMG as auditor and Schellenberg Wittmer, one of the largest Swiss law firms, as counsel. Finally, we hired top professionals, with a long experience and high education level.
- Sumus Capital is fortunate to be able to grow at its own pace as it has been profitable from Year 1. Consequently, we aim to work with clients with whom we share the same vision of asset management and to whom we believe we can deliver what they seek for. As experienced professionals, we know where our strengths lie and where we lack skills.

OUR MANDATES
& OUR PRODUCTS

MANDATES PHILOSOPHY AND PRICING

- Our competences mainly reside in in-depth knowledge of strategic asset allocation, bonds, equities, commodities and fund/managers selection. For specific asset classes we also invest through ETFs or third-party funds. We operate in open architecture, but we take the utmost care in the selection of third-party products invested in our customers' portfolios. Investment in our own funds is limited and only takes place if it brings benefits to the client, like enhanced diversification or cost-effectiveness.
- We offer different types of mandates tailored to the needs and profile of our clients. In any case, our management style is very much Total Return oriented. We always try to have an asymmetric approach to the risk: we become quickly defensive and prefer to wait for confirmations or strong convictions before opening to new risks.
- Our pricing is negotiated individually for each mandate, ensuring a customized approach to meet the unique needs of our clients. It's important for our clients to understand that we advocate for a performance fee in addition to the management fee. While our management fees are typically below the market average, we implement an additional fee only when performance is positive, using a high watermark model.
