

Junior Full-Stack Web Developer

The ideal fit for our team is an enthusiastic full-stack web developer who cares about details and enjoys learning and experimentation. You will join a small team that works collaboratively to make a big impact. Within our team you will work closely with marketing, design and production to help shape the future of our online shop, ERP system and everything in between.

We are currently working with PHP, Python, MySQL, Postgres, and Node.js, among others.

Skills we're looking for:

- Good understanding of object-oriented PHP
- Solid front end development skills
- Comfortable with version control and the command line
- Excellent written and verbal communication skills in English

Also nice to have:

- Python experience
- Experience with ERP systems, especially Odoo
- Experience with e-Commerce, especially Magento
- Experience with configuration management such (Ansible, Chef, Puppet, etc.)
- Interest in modern web technologies (NoSQL databases, Node.js, etc.)

What we offer:

- Venture-funded, international team with global ambitions
- Meaningful collaboration
- Quick iteration cycles and full involvement with design and marketing teams
- Nice office in Berlin-Kreuzberg
- Competitive salary & shares

About Stilnest:

We make design happen. We work at the intersection of fashion, design and high-tech. We help talented designers and fashion icons from around the world to produce their own design objects using our expertise and the power of 3D-printing. At Stilnest creatives, technologists, visionaries, entrepreneurs, culture hackers and aesthetes come together to use the power of 3D-printing to create exceptional products.
