### ***Letter of support***

Europa Donna, the Slovenian breast cancer society, is an independent, non-profit organisation. It connects healthy women, breast cancer patients, individuals and professionals in Slovenia in the fight against cancer and is a member of the European breast cancer coalition.

Our main goal is to provide every woman in Slovenia equal opportunity for early discovery of the disease, immediate and effective treatment and rehabilitation. Most of our work and projects are for breast cancer patients and for breast cancer awareness.

We have always supported and will continue to support projects which are helping patients to get the right information and opinion. Project like Trustedoctor.com, facilitating patients' way to a second opinion, is certainly one of them.
