

Jacobs hope Foundation for Brain Tumours and Other Cancers

Letter of Support

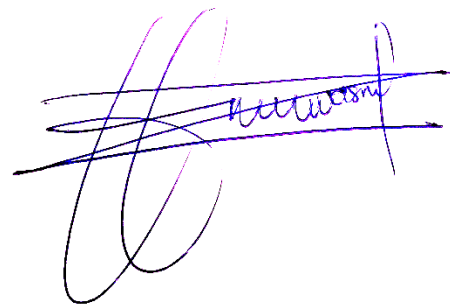

Jacobs Hope Foundation for Brain Tumours and Other Cancers was created in 2015. She is a non-profit association with major goal to create awareness on brain tumours and other cancers in Cameroon, Africa and the world.

Africa being a continent with a huge socio-cultural diversity, most cancers are regarded to be witchcraft related. Even when these cancers are identified, they are usually in the late stages making the treatment complicated. These patients and their families usually cannot either get correct diagnosis, consult a specialist or afford quality care. They turn to other forms of therapy which usually ends up leaving these patients and families in very devastating conditions. The reason why we created this association to sensitize people on Brain tumours and other cancers.

Therefore, we would love to support the project “*TrusteDoctor.*” This will greatly help patients in Africa with brain cancers and other forms of cancers to a second opinion and different treatment options of their health conditions.

The Vice President
