## LETTER OF SUPPORT

„ZVONČICA“ Childhood Cancer Parent Organization is established on 1992, at the Department of Hematooncology at the „Mother and Child Health Care Institute of Serbia“ in Belgrade.

Parents of children and young adults with cancer, as well as other paediatric rare diseases from developing countries in Europe, are not always fully and appropriate informed about the child's diagnoses and possible treatment. Due to numerous limitations, such as lack of knowledge, economic circumstances, cross border barriers and many other challenges, patients and their parents are often deprived of the possibility for a second opinion and other options for treatment.

Therefore, we would like to support the initiative of the project „TrusteDoctor“, the platform that would help parents of children with cancer and other rare diseases, providing them an easy way to get second opinion and information about other treatment options of its child.

President of „ZVONČICA“

Mrs Vesna Skoko
