

## AURORA XDLSN3 – PUSH BUTTON, NARROWBAND IOT

A wireless IoT sensor system

PN: 1101131

### ABOUT

The AURORA Push Button unit lets you detect user clicks. Possible application areas include event tracking, alarming, and data simulation in existing AURORA networks.

The unit is equipped with NarrowBand IoT RF technology and a battery (CR123, 1550mA). Optionally, the unit can be equipped with LoRa or Sigfox.

### Configurator Environment

The unit can be configured Over-the-Air using the Vicotee AURORA Cloud Configurator software.

General Specifications	Min	Max	Other
Operating temperature	-20° C	50° C	
Storage temperature	-20° C	40° C	
Supply Voltage	1.6 V	3.6 V	
Battery	-	-	CR123, 1550mA
IP Level	-	-	IP 65
Dimensions <sup>(1)</sup>	-	-	70mm(L), 50mm(W), 30mm(D)

TEMPERATURE SENSOR	Min	Max
High Accuracy Temperature Sensor $\pm 0.4$ °C (max)	-10°C	85°C
Power Consumption	60 $\mu$ A	150 $\mu$ A
