

BINDBOARD

Problem

Frequent discomfort at the beginning and at the end of snowboarding

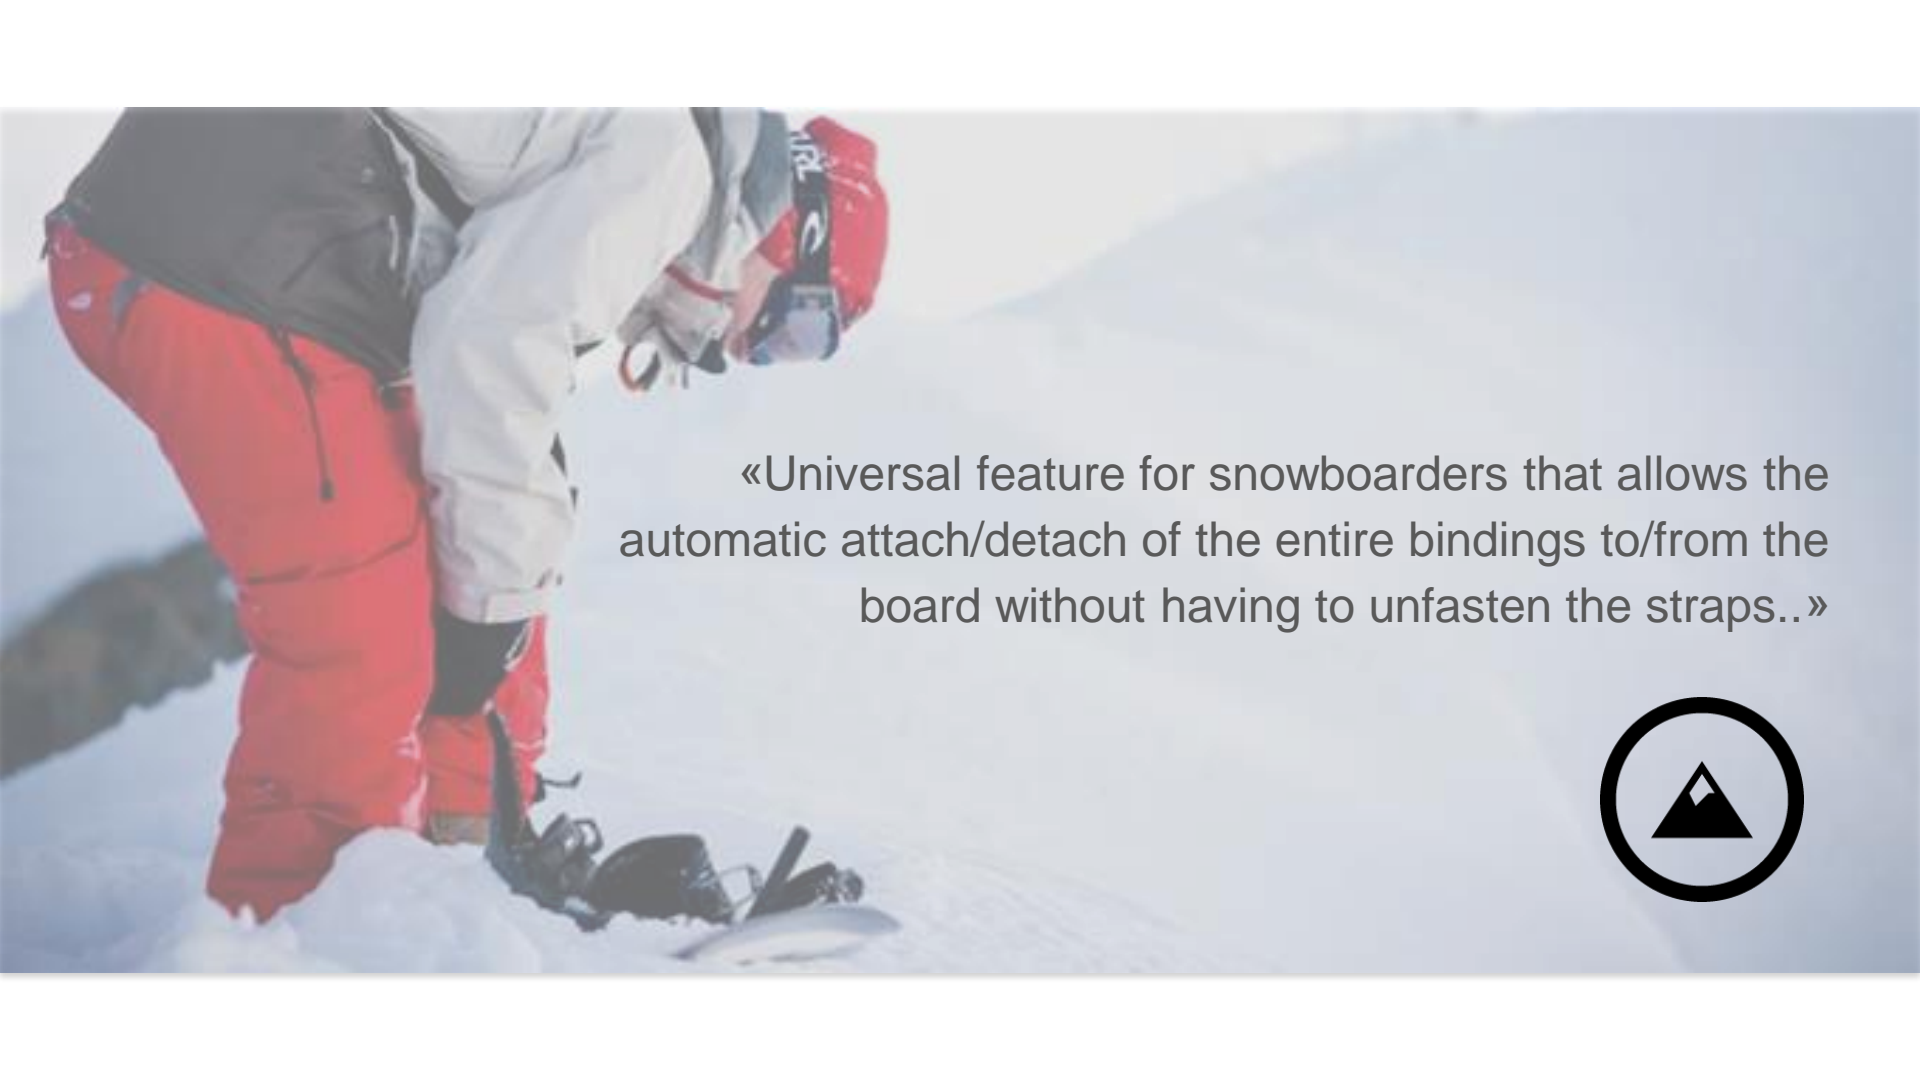

- **Cervical** pain
- Cause of **agglomerations** outside the ski lifts
- Problems to slide on **flat surfaces**

Ergonomic system that enables the semi-automatic fastening and unfastening of the snowboarding boots

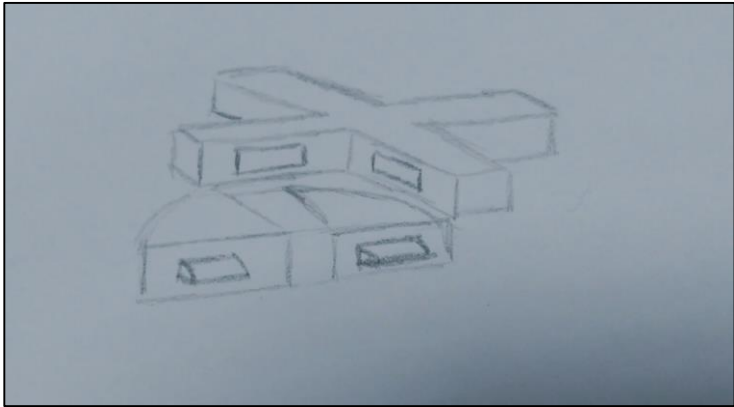

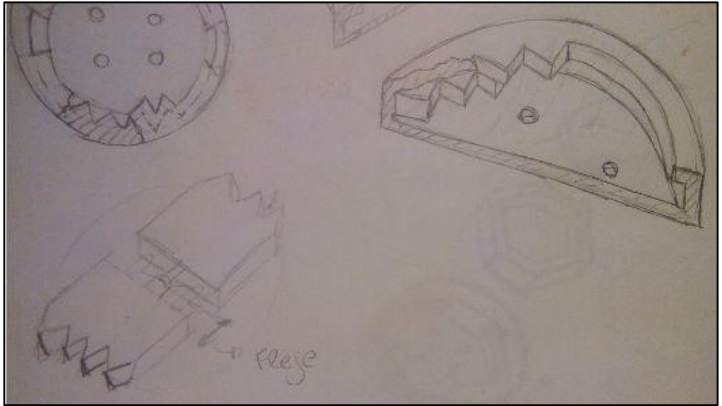

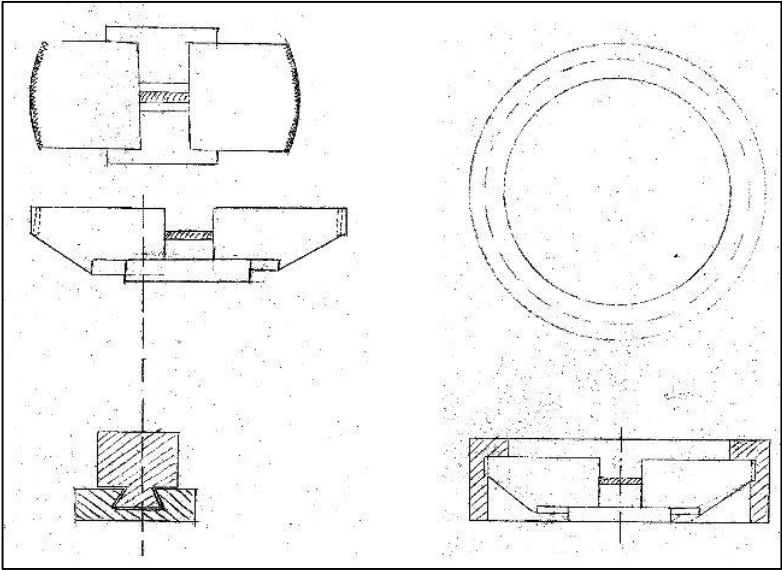

- **Prevent** cervical pain
- **Streamlining** ski lifts agglomerations
- **Facilitate** sliding on flat surfaces

«Universal feature for snowboarders that allows the automatic attach/detach of the entire bindings to/from the board without having to unfasten the straps..»
