

Welcome to another edition of the Silvair newsletter.  
We have some important news to share with you, so let's get right to it!

## Thank you all for visiting LFI 2022!

It was great to see you all at LFI 2022 in Las Vegas. We had many great discussions, and we cannot wait to meet you again next year in NYC. Special thanks to our Partners for presenting their solutions with Silvair technology. Together we show how strong the Qualified Bluetooth SIG mesh is and accelerate the global shift towards truly sustainable buildings!

Before

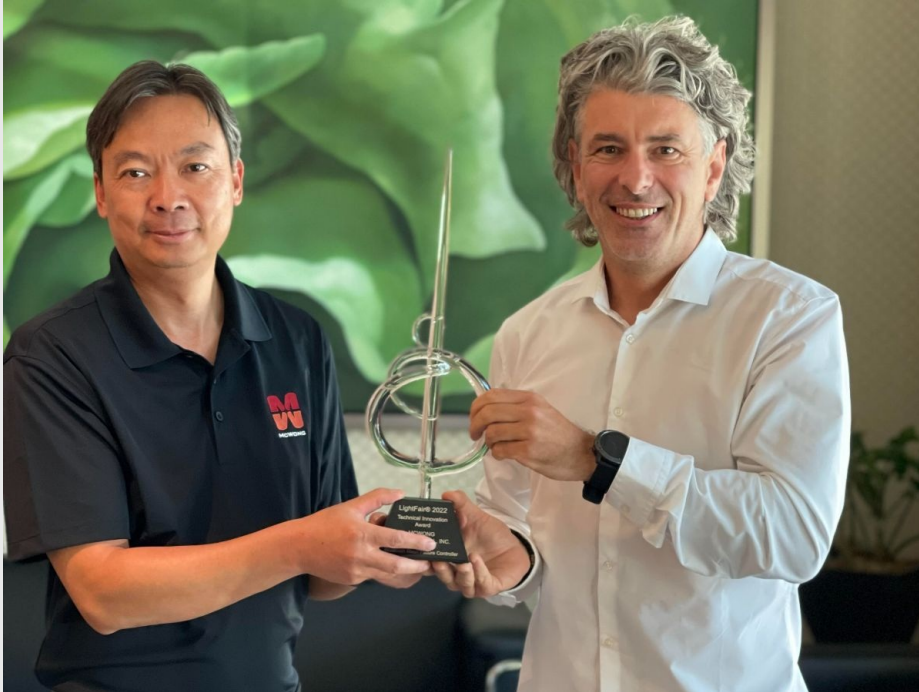

After

**Energy-efficient and intelligent**

## lighting from Sylvania Lighting in the Belgium shopping center.

Enhanced energy performance was one of the key priorities **Woluwe Shopping Centre** was looking to achieve with this project. Beyond the efficiency of the LED fixtures and the new smart control system, SylSmart Connected facilitated a further **74% reduction in energy savings, reaching an impressive 83% total energy reduction** compared to the original installation, which resulted in a **quick ROI of fewer than 1.4 years**. Read more about the Woluwe Shopping Centre installation and learn more about the benefits of SylSmart Connected controls.

## TruBlu Bluetooth mesh Fixture Controller won the LFI 2022 Technical Innovation Award!

Congratulations to our Partner - **McWong Inc.**, for winning the **LFI 2022 Technical Innovation Award**. The TruBlu Bluetooth mesh Fixture Controller with Long Range Antenna offers outdoor flexible yet powerful networked lighting control. Since hardwiring is cost-prohibitive for outdoor applications, introducing a long-range (900ft) Bluetooth mesh wireless controller that can be integrated directly into a wide range of commercially available fixtures eliminates "range anxiety. We're happy to be a part of this success! Congratulations to both teams - McWong and Silvair.

## Fluence is recognized as 2022 BrightStar Awards honorees for its

# Wireless Flex Dimming.

The LEDs Magazine's **BrightStar Awards** aims to recognize ingenuity in commercial product offerings across the LED and solid-state lighting (SSL) supply chain. Categories include indoor/outdoor illumination, horticultural lighting, connected lighting, circadian and disinfection lighting, and specialty applications. One of the recipients is our partner company **Fluence**. It was recognized for **Wireless Flex Dimming - Horticultural SSL and Controls Systems** with Silvair technology inside. Congratulations!
