

Welcome to another edition of the Silvair newsletter.
We have some important news to share with you, so let's get right to it!

We are bringing wireless controls to the epicentre of connectivity!

We're excited to share this case study! This year, the time came for the lighting infrastructure at the **Bluetooth SIG headquarters** to be remodeled. The project covered **15,700 SqFt**, and LSI Industries Inc. has provided **170 Bluetooth mesh devices** from Murata, McWong International, Inc, Fulham Co., Inc., and EnOcean! Now, Bluetooth SIG employees can have **first-hand experience** and see all the benefits of Bluetooth networked lighting control system in their office environment.

Breaking
new ground

The world's leading trade fair for
lighting and building services technology

Let's meet at L+B next week!

Light and Building is finally back! This year's focus will be on **intelligent and connected solutions**, forward-looking technologies, and current design trends. **Our team will be in Frankfurt next week**, and we're happy to meet and discuss the potential of networked lighting controls. Let us know if you are around!

Bluetooth SIG recognition awards

Every year, the **Bluetooth Special Interest Group (SIG)** celebrates the hard work and commitment of working groups, committee members, and contributors their peers have recognized as making a difference in advancing Bluetooth technology.

This year, our team member **Piotr Winiarczyk** was recognized for his **outstanding contribution** to the Mesh Devices Working Group! Congratulations to Piotr!

Beyond Lighting—Why Connecting with Your Data Via API's is so Important

13 October | 13:45 BST

Silvair | Ewa Spohn

Join us at Smart Building Show 2022 and learn more about API!

Take part in **Smart Building Show 2022** in London on **October 13** and learn how to connect with your building data and turn it into tangible business value! **Ewa Spohn** from our team will explain everything you need to know about truly **smart buildings**! Ewa will talk more about why connecting with your data via **APIs** is so important these days.
