

Welcome to another edition of the Silvair newsletter.
We have some important news to share with you, so let's get right to it!

DLC certification proves Bluetooth mesh meets rigorous requirements for lighting control

DLC certification of solutions based on **Bluetooth mesh technology** is another significant step towards democratizing lighting control. Step by step, the Bluetooth® mesh standard reduces barriers to highly energy-efficient lighting control strategies, pushing the commercial real estate sector closer to a sustainable future. Read our guest blog post published on the Bluetooth SIG website!

ENERGY MONITORING SYSTEMS ADD VALUE IN LIGHTING RETROFITS

Learn how in a webcast hosted by LEDs Magazine on March 31

Presented by:
SILVAIR

Register for FREE!

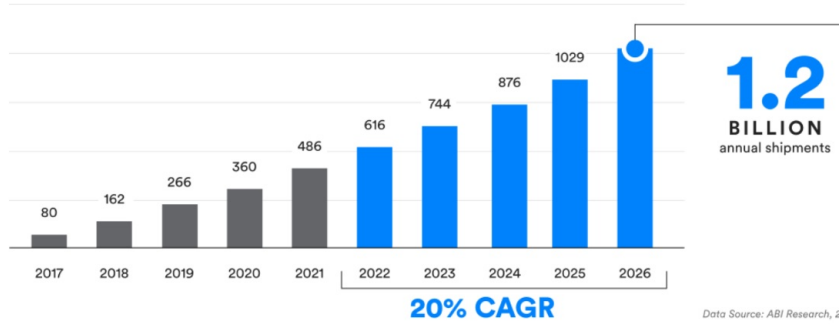

In case you missed our webinar!

Our webinar with Jim Sekinger and Paul Chamberlain about energy efficiency in retrofitting projects, hosted by LEDs Magazine, is **still available for on-demand viewing**. Great opportunity to learn how high-performance lighting delivers initial tremendous energy efficiency, how an energy dashboard can monitor ongoing system performance, and how data can be turned into valuable insights leading to additional savings.
