- Additional Information Sheet
- G277/577 Quick Reference Guide

Notice on the use of the handsets

Like all cordless telephones, the G277/577 DECT handset uses radio signals, which do not guarantee a connection under all circumstances. Do not rely exclusively on the DECT handsets when making indispensable calls (such as medical emergencies).

SOS functions

The SOS functions of the G577 do not replace companion supervision by a colleague or other people. In case of critical, emergency or life-threatening situations make sure that other persons are present or that appropriate measures are taken.
Getting started

Installing the battery pack

1. Place the handset face down on a flat surface.
2. Slide the lock at the bottom of the battery compartment cover upwards and at the same time lift the cover away from the handset.
3. Remove the battery compartment cover.
4. Push the battery pack into the casing.
5. Replace the battery cover.

Installing the charger

1. Place the charger on a flat surface.
2. Connect the USB-C connector of the USB cable to (the back of) the charger.
3. Connect the type A USB connector to the USB AC/DC Adapter.
4. Connect the adapter to an electrical outlet.
5. Place the handset on the charger as shown in Figure 1.

Figure 1: G277/G577/G577h in Desktop Charger
Getting started

Charging the batteries

Place the handset in the charger as shown in Figure 1. For a few seconds the display of the handset shows:

![Battery charging display](image)

**Figure 2: Battery charging display**

| **Attention:** | The handset, if switched off, automatically switches on when placed in the charger. |

Charging a spare battery

The G277/577 Spare Battery Desktop Charger can be used to charge a spare battery pack for the G277/577. To charge a spare battery pack:

1. Place the spare battery pack in the spare battery charging slot compartment. (Upside down and with text on the battery pack facing to the front.)
2. Slide the spare battery pack under the plastic holder to keep it in place.

Charging guidelines

Please read the concerning section in the DECT Handsets – General Information Guide carefully!

Charging and operating times

Discharged batteries require 7 hours (using the spare battery slot might take longer) to completely recharge. Completely charged batteries provide the handset with up to 20 hours of talk time and 160 hours of standby time.
Charge display

The battery charge status appears on the top of the display screen:

Table 1: Battery charge status icons

<table>
<thead>
<tr>

</tr>
<tr>
<td><img src="image" alt="Fully charged icon" /></td>
<td>Fully charged (more than 90%)</td>
</tr>
</tbody>
</table>

When the battery is nearly discharged a warning beep sounds and, when not in a call, the display shows:

Figure 3: Battery low display

You cannot make calls while this message appears.

| 🌃 | Battery charge status  
Refer to [Table 1](#) for Battery status icons. |

**Time & Date area**

The Time & Date area is only shown in Idle mode and gives the current time and date. In any other mode this part of the display is added to the Dialogue area (see next).

**Dialogue area**

The Dialogue area displays information according to the operational mode of the handset:

**Idle mode**

In Idle mode, the dialogue area displays information like DECT system name, handset’s DNR, and so on.

![Figure 7: Idle mode screen](image)

**Call mode**

In Call mode, the dialogue area displays information related to the call, like number and name of the calling/connected party and some status icons (see [Table 4](#) and [Table 5](#)).
Table 4: Call Set-up icons

Dialogue mode

In Dialogue mode, the dialogue area displays dialogues regarding missed calls (see Figure 8), messaging, menu settings, warnings and so on (see for some examples).
Getting started

Menu mode
In Menu mode, the dialogue area displays the menu icons or menu sections (tabs) and the specific menu items. E.g.:

![Figure 8: Examples Dialogue mode](image)

Edit mode
In Edit mode, you can use the dialogue area to enter and edit digits (e.g., for numbers) and text, e.g., for contact information editing:

![Figure 9: Main menu and General setting menu](image)

![Figure 10: Contacts name and number editing](image)
## Getting started

Table 6 shows the key to press to insert letters, numbers or symbols.

Besides the physical keys also the soft key is used in the Edit mode to insert (symbol) characters.

Soft key line

Soft keys appear below the handset dialogue area. The key functions change automatically according to the operational state of the handset.
Getting started

Used notation in this manual

Main menu icons are used to indicate selection of the appropriate menu.
To select the appropriate main menu item use the NAVIGATION keys.

Off-white box with text indicates a selected menu item.
To select the appropriate menu item use the UP and/or DOWN NAVIGATION key.

White box with dark blue top containing text indicates some text or number needs to be given.
To supply the necessary information use the keypad and the NAVIGATION keys.

Dark box with question mark indicates a question that the user needs to answer to.
To supply the answer use the appropriate soft key.

Press the indicated key.
Getting started

The blue box with text indicates a soft key.

The three icons are special soft keys (available in the idle state).
Select the appropriate soft key to execute the indicated action:
- Left soft key
- Middle soft key
- Right soft key

Use the keypad and/or the **NAVIGATION** keys to enter or change a number, date, name or text:
- Use the keypad to insert one or more digits (0 – 9, * and #) or characters
- To delete a digit or character use soft key
- Use the Navigation keys to move the cursor to the insertion point
- Use the Up or Down Navigation key to increase or decrease the value of the selected field

Use (one of) the **NAVIGATION** keys

Use LEFT and/or **RIGHT NAVIGATION** key

Use UP and/or **DOWN NAVIGATION** key.
Getting started

n  Press (soft) key displayed one or more times

Optional step(s):  The following step(s) is (are) optional (and marked by a blue line), i.e.,
  •  they can be skipped by the user OR
  •  they are not offered to the user.

→ ❶  Used when the following actions (steps) depend on some condition. The condition is preceding the arrow, and the next action to be taken is marked by the indicated number (here: ❶).

All actions belonging to set of actions to be taken, are marked by an orange line at the beginning of the actions.
General functions

Switching the handset on
1.  

Switching the handset off
1.  
2.  Yes

Key lock

Attention: You can dial 911 and 112 when the key lock is active. The key lock does not affect the SOS key.

Locking
1.  
2.  
Also automatic keypad lock can be set from the Settings menu.

Unlocking
1.  
2.  
Also automatic keypad lock can be set from the Settings menu.
Call features

Make a call

Dialling a number
1.
2. Enter/edit: Number

Using Predial mode
1. Enter/edit: Number
2.

7. 
   Yes

Save in caller filter

Start current item in caller filter?
Normal, urgent and emergency messages

The system differentiates between Normal, Urgent and Emergency messages.

*Note:* It is not possible to send an Emergency message from your DECT handset.

Normal messages

The melody assigned to Notification normal plays when you receive a normal message. If you receive a normal message during a call, a short alert tone sounds.

Urgent messages

The handset shows urgent messages immediately on the display.

The melody assigned to Notification urgent plays when you receive an urgent message. If you receive an urgent message during a call, a repeated short alert tone sounds.

Emergency messages

The handset shows emergency messages immediately on the display.

The melody assigned to Notification emergency plays when you receive an emergency message. The ringer volume increases to the maximum during the signaling process. If you receive an emergency message during a call, a repeated and in volume increasing short alert tone sounds.
Confirming receipts

You must confirm the receipt of urgent and emergency messages. If you do not confirm the message within 60 seconds, the initiator receives a message that indicates the message was not delivered.

To confirm:

Positively: ☑️ Or Yes

Negatively: ❌ Or Reject

Message list full

Attention:

If the display shows this warning no new message can be received. Delete some messages or change the Overwrite old setting to On – see Message settings (page 53).

Message Menu Sections

The Messaging menu contains a number of sections:

   Add to contact

4.  
   Select

5.  Continue as in *Add a number to an existing contact (page 37)* from step 5.
Messaging

Message settings

The following messaging options can be configured to On or Off:

- **Overwrite old** to control what happens when the handset receives a new message, but there is no room to store more messages:
  - **On**: the oldest message stored on the phone is overwritten.
  - **Off**: new message is not stored. An Urgent or Emergency message is shown on the display; a Normal message is rejected.

- **Sent messages** to control whether sent messages are stored in the handset (On) or not (Off).

- **Display** to control whether Normal messages are displayed immediately upon receipt (On) or not (Off).

- **Auto answer msg** – Please contact your System Administrator

- **Silent answer msg** – Please contact your System Administrator

---

14 If configured: redirect call to alternative destination
Telephone settings

Note: Currently set value is marked by a blue dot (●)

4. Select

5. n

Defining the missed call time

Open Settings menu section:

1. 

2. Select

3. 

4. Select

5. n

Voicemail

Use the Voicemail feature to listen to voice messages left by calling parties\(^\text{15}\). You receive a voicemail in the following situations:

a. if your handset is switched off
b. if your handset is busy
c. if your handset is out of the coverage area

A new voice message dialogue appears only once, i.e., when a caller leaves a first new message in the mailbox. A voicemail

\(^{15}\) Your communications system needs to support the Voicemail feature
symbol ( ) appears in the icon line; it disappears after you play the message.

Assigning the Voicemail number

Open Settings menu section:

1. Clear
2. Select
3. Select
4. Select
5. n
## Telephone settings
