Built-in Brilliance

The SL2100
Communications System

www.NECSL2100.com
The way we do business and the way we communicate is changing rapidly. Mobility has become the norm. Customer expectations have soared and budgets have shrunk.

The SL2100 galvanizes your team. In turn, it creates a positive customer experience that generates repeat business.

It’s highly cost effective because there’s more built-in. With VoIP capabilities, it puts Unified Communications within reach of small businesses SL2100 future proofs your upgrade potential to IP. It also presents considerable savings and functionality over and above alternative hosted solutions.

Your business can’t afford downtime and nor can your communications. The SL2100 provides a reliable, ‘always on’ solution. There’s less hardware, less licenses and less maintenance to worry about.

---

**Value for money**
Powerful communications with a small business price tag that allows you to pay only for what you need. Completely scalable as your business grows.

**Save Money with SIP Trunks**
SL2100 combined with NEC’s UNIVERGE BLUE SIP Trunks combines ease of implementation with reoccurring cost savings.

**Keep connected**
Single number reach, DECT mobile handsets, built-in conferencing and voice-mail keeps colleagues and customers up-to-date and connected.

**Safety first**
The E911 feature alerts specified users to who dialed 911 once an emergency call is made so that first responders can be routed to the emergency once onsite.
The ‘On-Demand’ Workforce

With the advent of all the communications technologies in the market, customers expect to be able to reach someone at a business to get immediate answers and information - without having to leave a message. To assist in maintaining a positive customer experience and a high level of service, businesses today need to have workforces that are available and ‘on-demand’ from any location. A great customer experience usually generates repeat business.

With NEC’s SL2100, you can ensure that your team stays connected through its wide-range of communication tools that accommodate flexible workspaces and allow free roaming wherever they are.

Work Smarter - Applications to increase efficiency

NEC’s SL2100’s InUC delivers to you an integrated unified communications (UC) solution that enhances your organization’s productivity and collaboration. This productivity-boosting solution offers you key functions that deliver excellent business benefits. With InUC’s intuitive web-based client, it enables full call control from your PC screen. It offers a quick and easy way to manage calls and look up contacts. It also provides video conferencing, collaboration, document sharing, presence and instant messaging which allows you to stay connected and productive from any location.

Remote/home office workers

Users can enjoy a complete phone user experience from their home office plus greater working flexibility. Individual and business benefits include the reduction of workspace cost and travel time. IP Desktop handsets provide access to system features from the home, e.g. contacts directory, call transfer and more.

Stay connected while on the move

With Mobile Extension, you can take your office number with you when you’re on the move. It provides you access to system features such as caller ID, call transfer and voicemail and it really is like being in the office, whether you’re traveling or sitting in traffic.

On the road

Use your existing Smartphone as a system extension complete with call control. Save on mobile call costs and remain reachable on a single number. With the ST500 Smartphone App, simply connect to the SL2100 via Wi-Fi or across your Mobile Data Network.

> Never miss a call
> Enable Single Number Reach

In the office

Feel free to roam around your office while staying connected and reachable. The SL2100’s IP mobile handsets enable you to take most of the features and functionality of your desktop phone with you as you take care of business from different locations throughout your building. You also have the options to manually Login/Out of any IP desktop phone to use as your own extension and use wireless headset adapters for hands-free operation.

Built-in features include:

> VoIP Enabled
> Voicemail
> Music on Hold
> Mobility / Remote Worker Support
> Auto Attendant
> Audio Conferencing
> Video Conferencing & Collaboration (license required)
> InGuard Toll Fraud Protection (License required)
> SIP Trunks (License required)
Running your business on an outdated system or forcing employees to use old devices that are ill equipped to handle their multi-faceted communications needs is bad for business. To facilitate smarter work environments, NEC has developed the next generation of desktop telephones.

Call from your desk phone
NEC's innovative desktop endpoint design is intended to deliver maximum deployment flexibility. A wide range of choices allow for multiple combinations that fit any and all business niches or personalization requirements.

Reasons to choose SL2100 Telephones
- **Wide-Range of Choices** – choose from 12/24-button digital, self-labeling 32-button IP (standard or color display), IP wireless handsets
- **Customizable function keys** – can be adapted to the exact individual requirements of your business
- **User-friendly interface** – little or no staff training required
- **Gigabit built-in** – eliminates the need of having to buy an adapter, even on self-labeling telephones (Not available on all models)
- **Wireless headset adapter** – allows easy connection to Plantronics’ wireless headsets

Personal, system and corporate directories
SL2100 Desktop telephone directory gives you easy access to system wide and personal speed dials as well as extensions by name. There’s no need to waste time looking up phone numbers. Each entry in the directory is searchable, and a call can be placed from the searched entry.

Easy-to-use, intuitive interfaces
NEC’s desktop telephone interfaces are designed to improve the overall user experience, while remaining intuitive – with no extensive training needed. Global icons indicate status at-a-glance, including notification of new voice or instant messages, missed calls, the telephone user’s current presence status, and the device’s current data protection mode.

Unique customizable business telephones
Our wide range of SL2100 Desktop Telephones are like no other. Their customizable construction means you can change the design for exact business requirements. Whether your employees need just a basic single line telephone or one with a 60-line console attached, NEC offers telephones to fit everyone’s needs.

Smart User Solutions

Small/Medium Organizations
Organizations of all types, including businesses for real estate, insurance, finance/banking, law, as well as non-profits and churches, require robust communication tools to service their clients.

> Self-service options allow callers to easily get to the person or department they want to reach without going through an operator - if person is unavailable, they can leave a detailed message
> A range of mobility options enable employees to stay connected and reachable from any location – on or off premises
> Ability to set up multiple ring or department groups ensures callers will be able to speak to a live person

Retail
Handle incoming callers with ease while servicing in-store customers.

> Pre-recorded message options enable callers to quickly get to the information they need (store address, hours of operation, etc…) without interrupting service to in-store customers
> While out on the floor, quickly find out information the customer needs by reaching out via a mobile handset
> Toll restriction capabilities limits use of store phones for long-distance except for authorized personnel – saving the store money

Food Service and Entertainment
Communicating effectively while you are mobile and servicing customers in a noisy, sometimes dimly lit environment which can cover large areas or multiple buildings can often prove to be a challenge.

> Mobility options, from mobile handsets to ST500 Smartphone App, keep you connected from anywhere
> Backlit displays are easily viewed in low lit areas
> Place telephones throughout the property with no worries of fraudulent long distance (LD) charges - LD calls can easily be restricted to authorized personnel only
> Automated Attendant frees up staff to assist customers on-premises

Dentist Offices
Deal with the morning telephone ‘rush hour’ more effectively. A high volume of incoming calls from patients wanting to book appointments at certain times of day can be dealt with easily with the option to log staff in and out of Call Groups.

> Relief can be given to receptionists during peak times
> A convenient way to share the workload
> Even small teams can deal with fluctuating call volume

Healthcare
Doctors’ offices, surgery centers and other healthcare organizations receive a high volume of frequent inquiries.

> Customized recorded messages are played to callers giving them the option to route themselves to the right department or leave a message for prescription refills, reducing the need for a receptionist to handle every call
> Eliminate the expense of an answering service with email or external message notifications to appropriate personnel during off hours
> PLUS! Enjoy the benefits of the G577h wireless IP DECT made from anti-bacterial plastics

Small Hotels
Ensure your guests have a memorable stay by providing them access to personalized services that enhance their experience. Guests can customize services from guestroom messaging, wake-up calls and do not disturb plus have one-touch access to important services.

> Room status monitoring of all your guestrooms maximizes usage
> Toll restriction ensures phones are not used for long distance calling except by authorized personnel
> NEC’s InHotel provides further front-of-house functionality including complete room booking, billing, reports & hotel administration
> PLUS! NEC’s PMS Connectivity ensures your communications and PMS work together without the high cost of Middleware
Keeping Your Team in Touch

1. **Internal Sales Person**
   The Auto-Attendant feature means that callers receive a greeting and are routed to the correct department, ensuring that I only get the calls that are meant for me.

2. **Receptionist**
   With Caller ID displayed on my handset, I can give the appropriate greeting to callers and redirect calls from familiar numbers straight to the relevant colleague without answering.

3. **Security Guard**
   The E911 feature alerts me to what user dialed 911 for an emergency on-site so that I can quickly direct first responders. Also, the doorphone allows me to screen visitors as well.

4. **IT Manager**
   It’s easier than ever to manage our system settings and making system changes by using the WebPro GUI interface or the PC Pro client.

5. **Office Worker**
   The conference feature allows me to effortlessly set up a virtual meeting for colleagues at short notice, wherever they are. This enables faster business decisions, as well as saving traveling time and expenses.

6. **Team Manager**
   InUC allows users to update their presence status so that other users can see if they are out sick, on vacation or at lunch. Chat also allows instant communications between team members.

7. **Remote/Home Office**
   I can use my desktop phone or softphone at a remote or home office location to communicate with customers and colleagues with the same ease as if I were in the office.

8. **Mobile User**
   I can be on the road and stay reachable on my office number through my mobile phone, meaning that I don’t miss any important calls.
Built In Applications

The SL2100 now includes an expanded and diverse portfolio of In-Apps. As well as providing compelling business benefits, these built-in/on-board apps require no external PC or server - making them highly cost effective and reliable.

InUC - Built-in collaboration

InUC is a unified communications application providing video conferencing, collaboration, document sharing, presence and instant messaging for any business of up to 128 users. Utilizing WebRTC (Real-Time Communications) – InUC provides highly cost-effective video and collaboration that works seamlessly within your IT environment.

Automatic Call Distribution (ACD)

The SL2100’s ACD for busy offices evenly distributes calls to agents. When all agents are busy assisting callers, the outside party can listen to periodic announcement messages while waiting for an agent to become free. Callers can also overflow to another destination so that outside callers are not left waiting on hold for an extended period of time, making each interaction between your business and your customers quick and easy. Reporting of ACD activity is possible with the optional Contact Center feature.

Hotel Applications

NEC’s SL2100’s built-in Hotel/Motel provides personalized services that enhance guest’s experience.

Ideal for hotels of up to 96 rooms, this easy to use platform is designed to increase your staff’s productivity and significantly lower your running costs. Features include guestroom messaging, wake-up calls, and single digit dialing to front/back office functions such as message waiting, room status, voicemail integration and mailboxes management. NEC’s InHotel provides further front-of-house functionality including complete room booking, billing, reports & hotel administration. For hotels which already have a front-of-house solution in place - NEC’s PMS-Connect ensures your communications and PMS work together without the high cost of Middleware.

Phone Pro

User administration is made easy with Phone Pro. Phone Pro is included with every SL2100 enabling authorized end users to make changes to their own extension such as their extension name, passwords, set call forward and ring tones, even print their own DESI label for their extension.
Smart Mobility Options

Today’s mobile workers depend on communication tools that accommodate flexible workspaces and allow free roaming wherever they are. The SL2100 ensures your team stays connected, but without the escalating business mobile costs.

On premises

For the ultimate device for voice, and in-house mobility – the solution provides:

- **True on-site mobility** that improves efficiency and productivity - resulting in improved customer satisfaction
- **A cost-effective in-building wireless solution** built on proven technology

Remote/home office

Users can enjoy a complete phone user experience from their home office plus greater working flexibility. Individual and business benefits include the cost and time savings of travel and even the associated costs of workspace.

IP Desktop handsets provide access to system features from the home, e.g. company directory, call transfer and more.

On the road

Use your existing Smartphone as a system extension complete with call control. Save on mobile call costs and remain reachable on a single number. The UNIVERGE ST500 Smartphone Client App simply connects to the SL2100 via Wi-Fi or across the Mobile Data Network.

- **Never miss a call**
- **Single Number Reach**
When choosing a communications solution you need good value for your initial investment, followed by low running costs thereafter. The SL2100 provides this along with further cost saving benefits including increased team efficiency and productivity. Intuitive features also ensure staff training is no longer required. Other everyday benefits such as simply answering an incoming call first time helps reduce the cost of call backs and saves your team precious business hours.

10 more ways the SL2100 provides value

1. **More features built-in** – less extras to pay for! That means less licenses, less hardware and less options to pay for. The SL2100 also grows with your business making incremental upgrades cost-effective and scalable.

2. **SIP trunks have never been easier!** – In addition to supporting a variety of SIP Trunk providers, Using SL2100 with NEC’s UNIVERGE BLUE SIP trunks combines ease of implementation with reoccurring cost savings.

3. **Want to use your own smart device?** ST500 Smartphone App & Mobile Extension enable phone system calls via your Android or iOS Smart device.

4. **ACD and contact center software** – Routes callers based on pre-established criteria and allows supervisors to monitor agents to ensure superior customer care.

5. **InControl call reporting** - Allows you to create reports for most all of the call activity in your company, such as, inbound and outbound call volume, total calls, duration of calls and average duration of calls and more.

6. **On-premises mobility** – Mobile wireless handsets enable users to stay connected and productive from any location in your building.

7. **Work smarter (InUC, WebRTC)** – InUC allows users to update their presence status so that other users can see if they are out sick, on vacation or at lunch and WebRTC enables collaboration via video conferencing.

8. **Built-in audio conferencing** – Save travel and even hotel costs with easy to use conferencing.

9. **User administration** - Phone Pro is included with every SL2100 enabling authorized end users to make changes to their own extension such as their extension name, passwords, set call forward and ring tones, even print their own DESI label for their extension.

10. **Multiple sites? No Problem with SL Net.** By networking multiple SL2100 systems to act as a single “Virtual” SL2100 – this enables shared features between sites including: intercom, DSS/BLF indications, centralized Voicemail & Auto Attendant.
SL2100’s Usage Examples

Today’s mobile workers depend on communication tools that accommodate flexible workspaces and allow free roaming wherever they are. The SL2100 ensures your team stays connected, but without the escalating business mobile costs.

**Small/Medium Organizations using Auto Attendant**
High call volumes in organizations can result in lost productivity. With an auto attendant, customizable pre-recorded messages:

> Provide callers with self-service options to easily get to the person or department they are trying to reach without going through the operator – allowing the operator to work on other tasks
> Can provide callers with information that is most frequently asked, such as, “when are you open?”, “what is your address?”, etc…

**Retail Stores using Mobile Wireless Handsets**
Retail personnel are usually always on the move and it is difficult for them to stay connected. With the use of Mobile Wireless Handsets, they can:

> Freely roam throughout the store to service customers while staying connected to answer caller inquiries
> Call colleagues with questions about a certain product, inventory availability, etc…to get an immediate answer for a customer

**Healthcare Facility using Auto Attendant**
Doctor’s offices, surgery centers and similar other healthcare facilities routinely receive a high volume of inquiries throughout the day. With an auto attendant, pre-recorded messages tailored to their practice:

> Enable patients to use the self-service options to reach the right person or department for things such as scheduling an appointment, leaving a detailed message for their doctor’s nurse, refilling prescriptions and/or get the information they need regarding hours of operation, address, etc…
> Free up staff to be able to focus more of their attention on servicing the patients currently in their office

**Dentist Offices using Call Groups**
Dentist offices typically receive a large volume of incoming calls in the morning and it can be difficult sometimes to keep up. With the use of call groups, staff can:

> Easily log in and out of a particular call group to assist receptionist during peak calling hours
> Handle fluctuating call volumes at any time to ensure patients/callers are taken care of in a timely manner
SL2100 System Overview

DT920 IP Self-Labeling Color Display Telephone
- VoIP NEC i-SIP Multi-Line Telephone for SL2100
- Supports Ethernet Gigabit Speed (Full Duplex)
- 8 Programmable Keys Visible at a Time (May Scroll Up to 32)
