The SL2100

Built-in Brilliance

Smart Communications for Small Business

**Why Choose the SL2100?**
The way we do business and communicate is changing rapidly. Mobility has become the norm, customer expectations have soared and budgets have shrunk.

With the SL2100 communications solution, it increases your team’s performance and creates a positive customer experience that generates repeat business.

It’s highly cost effective because there’s more built-in. With VoIP capabilities, it puts Unified Communications within reach of small businesses. SL2100 future-proofs your upgrade potential to IP. It also presents considerable savings and functionality over and above alternative hosted solutions.

Your business can’t afford downtime and nor can your communications. The SL2100 provides a reliable, ‘always on’ solution. There’s less hardware, less licenses and less maintenance to worry about.

www.NECSL2100.com
Value for Money
- Powerful IP communications with a small business price tag
- Low cost entry into an entirely scalable IP solution
- Lower operational costs considerably by making smarter use of your communications

- Never miss important messages with enhanced voicemail to keep you up to date

Work Smarter - InUC
Intuitive applications to increase efficiency and productivity
NEC’s InUC delivers an integrated unified communications (UC) solution that enhances your organization’s productivity and collaboration. This productivity-boosting solution offers key functions that deliver excellent business benefits.

Manage Communications from Your Desktop PC Plus More
InUC’s web-based client is an intuitive application providing full call control from your PC screen. It offers a quick and easy way to manage calls and look up contacts. Users can update their presence status so that other users can see their status. Instant Messaging also allows instant communications between team members. It also provides video conferencing, collaboration and document sharing, which allows you to stay connected and productive from any location.

Support for Remote and Mobile Workers

Today’s mobile workers depend on communication tools that accommodate flexible workspaces and allow free roaming wherever they are. The SL2100 ensures your team stays connected, but without escalating business mobile costs.

Remote/Home Office Workers

Users can enjoy a complete phone user experience from their home office with IP Desktop telephones plus greater working flexibility. Individual and business benefits include the cost and time savings of travel and even the associated costs of workspace.

On the Road

With the ST500 Smartphone App, use your existing Smartphone as a system extension complete with call control. Save on mobile call costs and remain reachable on a single number. Simply connect to the SL2100 via Wi-Fi or across your Mobile Data Network.

In the Office

Stay connected and reachable with the SL2100’s IP mobile handsets. Take most of the features and functionality of your desktop phone with you as you take care of business throughout your building. Use any IP desktop phone as your own extension by manually logging in/out and use wireless headset adapters for hands-free operation.

Stay Connected while on the Move

Remain reachable via a single number from anywhere

With Mobile Extension, take your office number with you when you’re on the road. It provides access to system features such as caller ID, call transfer and voicemail and it really is like being in the office, whether you’re traveling or sitting in traffic.

- Company specialists can maintain high service standards when out of the office
- Ensure salespeople never miss a call which could lead to a lucrative business opportunity when they’re on the road
- With DECT mobile handsets, keep in touch from any in-building location

UNIVERGE ST500 Smartphone Client

Extend the capabilities of your smartphones

The SL2100 ST500 Smartphone Client App functions as a standard SIP station on iPhone® and Android™ smartphones, it allows you to:

- Directly answer incoming calls to your office telephone
- Make calls using your office telephone system and your office caller ID is displayed - masking your personal cell phone number
- Utilize a Wi-Fi hotspot at the office, at home or even at a public hotspot – and not use any of your cellular minutes
- Easily Hold and Transfer calls to other stations within your office telephone system
- Access your work Voicemail directly from your smartphone

More than Voicemail

Advanced features for enhanced communications

InMail is packed with powerful business features that make keeping up to date easier than ever. Message Notifications with the option to include audio attachments can be sent to your desktop phone, home office or mobile phone to allow you to monitor your mailbox effortlessly from wherever you are.

With the option of recorded personalized greetings, you can select the one most appropriate depending on your availability or the time of day. Additionally, the Call Record feature enables you to keep track of important discussions. Recordings can be emailed to colleagues and stored for quick reference at a later time.

Automatic Call Distribution (ACD)
Handle incoming calls with ease
The SL2100’s Automatic Call Distribution (ACD) efficiently routes
 callers based on pre-established criteria. ACD is great for people/
customers who require assistance from any of multiple persons at
the earliest opportunity. When all agents are busy assisting callers,
the outside party can listen to periodic Announcement messages
while waiting for an agent to become free. Callers can also over-
flow to another destination so that outside callers are not left wait-
ing on hold for an extended period of time, making each interaction
between your business and your customers quick and easy.

Contact Center Software
Monitor activity in real-time
The SL2100’s Contact Center software allows up to two Super-
visors to monitor the real-time activity of the system’s ACD, such
as Agent State and ACD Queue Status, using their PC’s. They
can also run ACD/Contact Center activity reports, such as Agent
Call Summary, Abandoned Calls, etc.

Networking
Extend the reach of your communications
With the SL2100’s networking capabilities, you can extend the
reach of your communications to remote offices and mobile
workers. You can eliminate duplication and improve efficiencies
by transparently sharing a single voicemail and intercom system.
It also enables you to share trunks and transfer calls easily.

SL2100 Digital Telephones
Offers 12 or 24 programmable keys with LEDs, full duplex speaker-
phone, dual-color call indicator lamp.

SL2100 IP Telephone
Color or Gray scale options of Self-labeling IP telephones which
supports gigabit connections and has 8 visible programmable
keys with LEDs with the ability to scroll up to 32 keys total, backlit
display, full duplex speakerphone, dual-color call indicator lamp
and remote/home office functionality.

DSS Console
Provides 60 programmable keys with
LEDs and is ideal for receptionists.

IP DECT
Choose from a wide range of wireless handsets offering true on
site mobility and crystal clear speech.
Our latest models are lightweight yet robust, have large color
displays and include SOS-keys for personal safety.

InHotel
NEC’S InHotel is a cost-effective property management system
for hotels providing easier bookings, billings & administration.
Ideal for hotels of up to 64 rooms, this easy to use platform is
designed to increase your staffs’ productivity, enhance guest
experience and significantly lower your running costs.

Note: Some features may be optional or available at a future date
